Economical high performance ac resistance standards

Features:
- Very stable - <20 ppm/year
- Calibrated at dc and 1 kHz
- Excellent temperature coefficient - as low as 1 ppm/°C
- < 20 ppm difference between dc and ac values at 1 kHz for resistances ≤ 100 kΩ
- Wide range of values - 1 mΩ to 10 MΩ
- bnc option (-bnc)
- Custom values are available
- Optional transit case

SRAC SERIES
Designed for use as a reference or working standard in industrial, research, and educational laboratories.

Frequency response
Frequency response of the foil resistors are given by the formula:

\[ R_s = \frac{R_{dc}}{(1 - \omega^2 LC)^2 + (\omega R_{dc}C)^2} \]
\[ R_p = R_{dc}(1 + (\omega L / R_{dc})^2) \]

Where worse case L = 0.1 μH and C = 1 pF

SPECIFICATIONS

Calibration conditions:
At 23°C, low power, traceable to the SI through an NMI. Connections as indicated in table.

Terminals:
Gold plated, tellurium copper, high current, heavy duty, low thermal-emf binding position standard 3/4 inch spacing. A case GROUND terminal is provided on all units.

Dimensions: 8.6 cm H x 10.5 cm W x 12.7 cm D (3.4” x 4.15” x 5”)

Operating temperature range: 15 to 30°C.

</table>

Foil resistors have a power coefficient of resistance (PCR) of ±5ppm at rated power due to internal heating.
Foil resistors have a voltage coefficient (VC) of < 3ppm/V

ORDERING INFORMATION

Standard model
Select from table above

Custom value
SRX-XXX or SRC-XXX

Transit case for SRac units
SRC-100, for 2 units
SRC-100-5, for 5 units

Options:
-bnc
4 bnc connectors plus ground
