

To select the dial that matches an existing 1433, you need two pieces of information: what the existing dials on the unit look like, and which switch is used underneath. Use the selection guide below to find the matching part.

**Note:** Only the dial assembly is included. The attached switches are shown for reference only.

### IET Dial

#### Description

This dial assembly is used for standard IET switches.

Most Common

**1433-4300-KNB**
